Project Start and the Design Process

Emin Zerman

2025-09-15

Project Work

- A very important part of the whole course work

Why? – to provide hands-on experience

Who (with)? – Performed in groups of 3-5 students.

What? – Develop and evaluate a prototype for a new interface. (*More in a minute*)

How? – A number of tutoring sessions.

- Examined through a combined grade:
  - Project report.
  - Oral presentation.

Project Work

- Develop and evaluate a prototype for a new interface.
  - Focus on **usability** over implemented functionality.
  - Design with the user at the center.
  - Iterative development method.

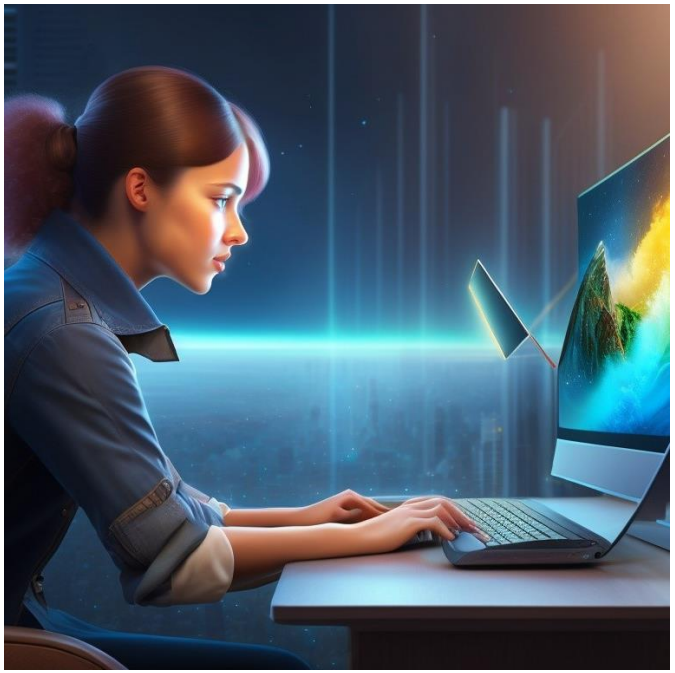

- Why not focus on functionality?

- Why iterative?

Timeline

	Mon	Tue	Wed	Thu	Fri
v38	Project start (C015 and C016, ALC)				Data collection (M209)
v39			Data analysis (M209)		
v40					
v41	Prototypes (C015 and C016, ALC)			Usability tests (M209)	
v42					
v43					
v44			Presentations	Presentations	

Design Process

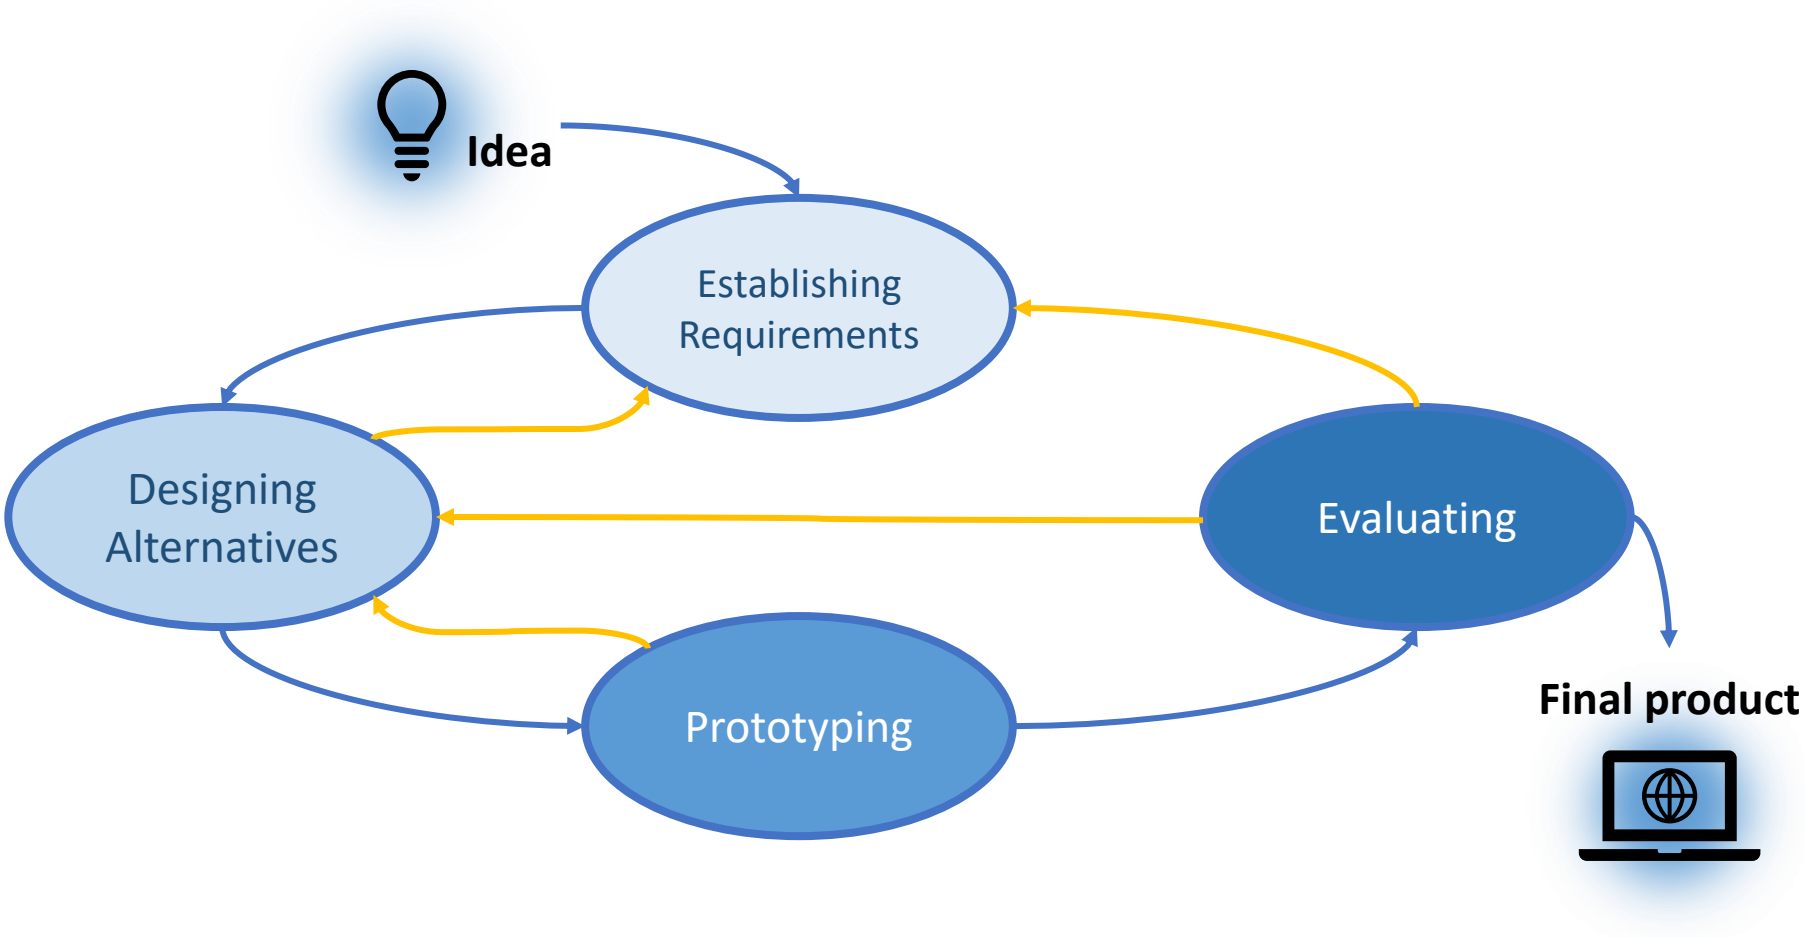

How do we design things?

How do you plan an event?
(e.g., a birthday party)

Design Process

Design Process

Design Process

Design Process

- Usability goals?
- User experience goals?
- Design principles

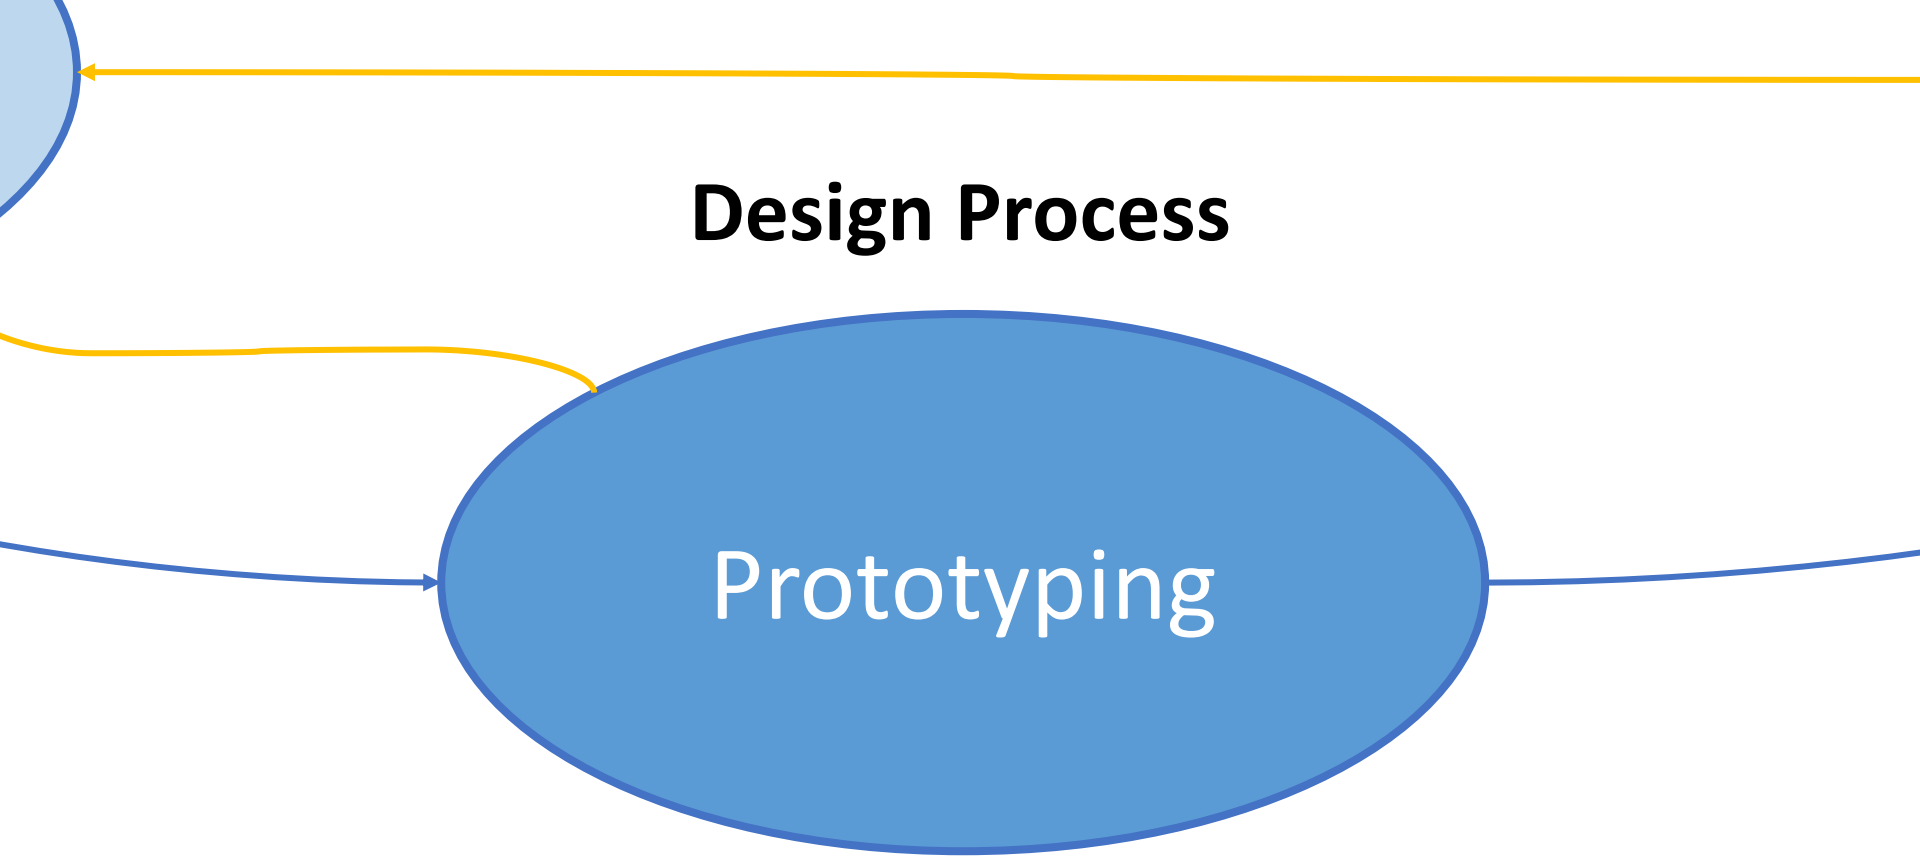

- Concept models
- Concrete design

Design Process

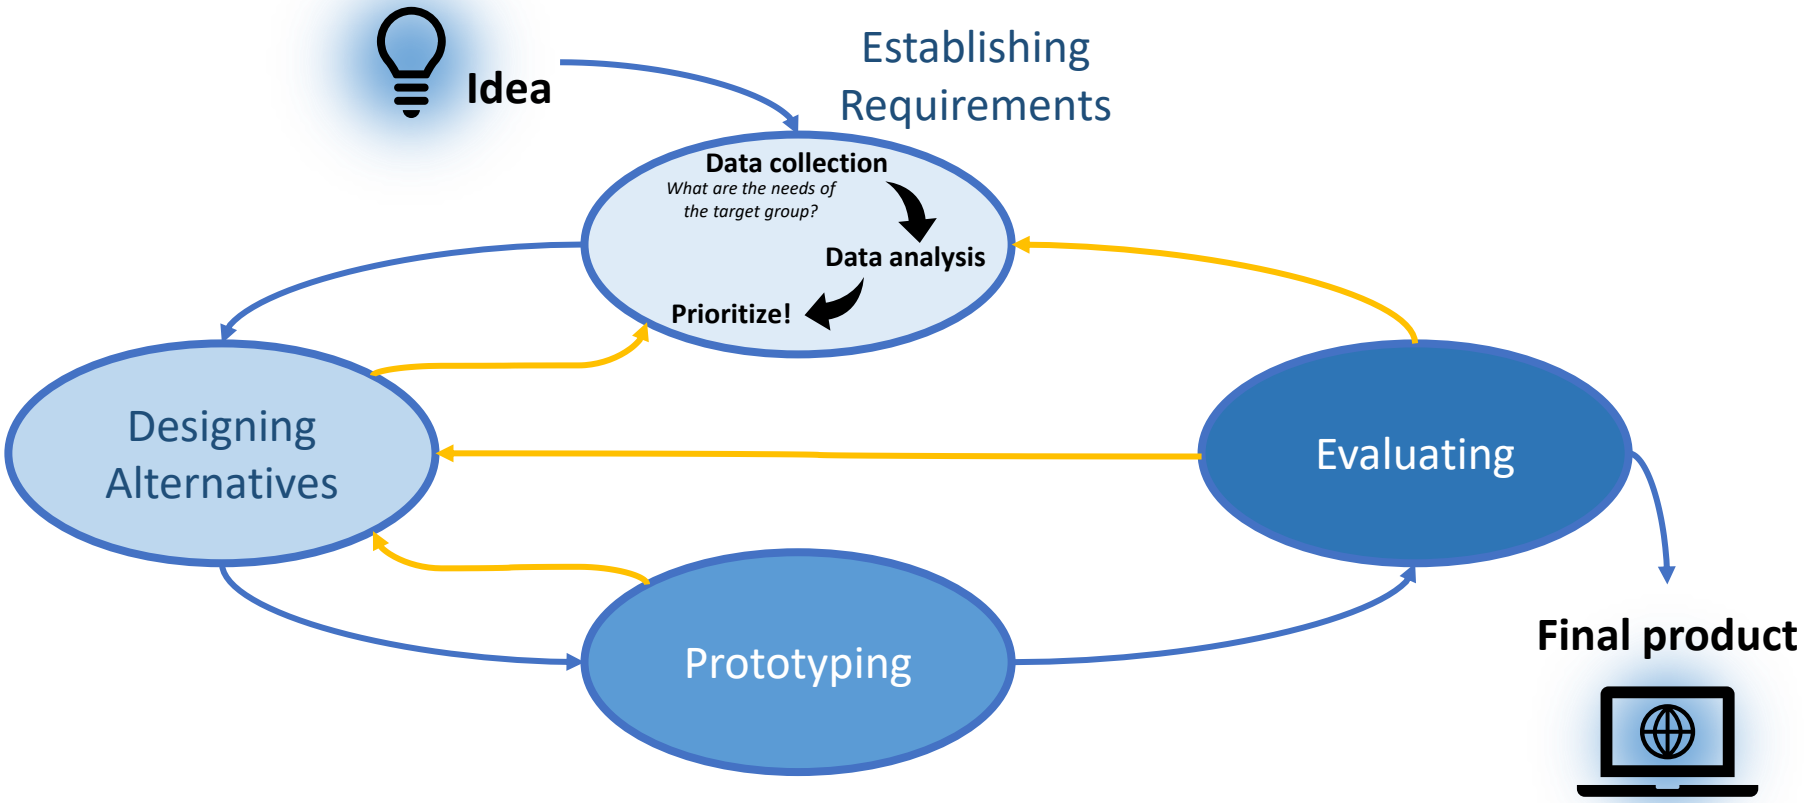

Design Process

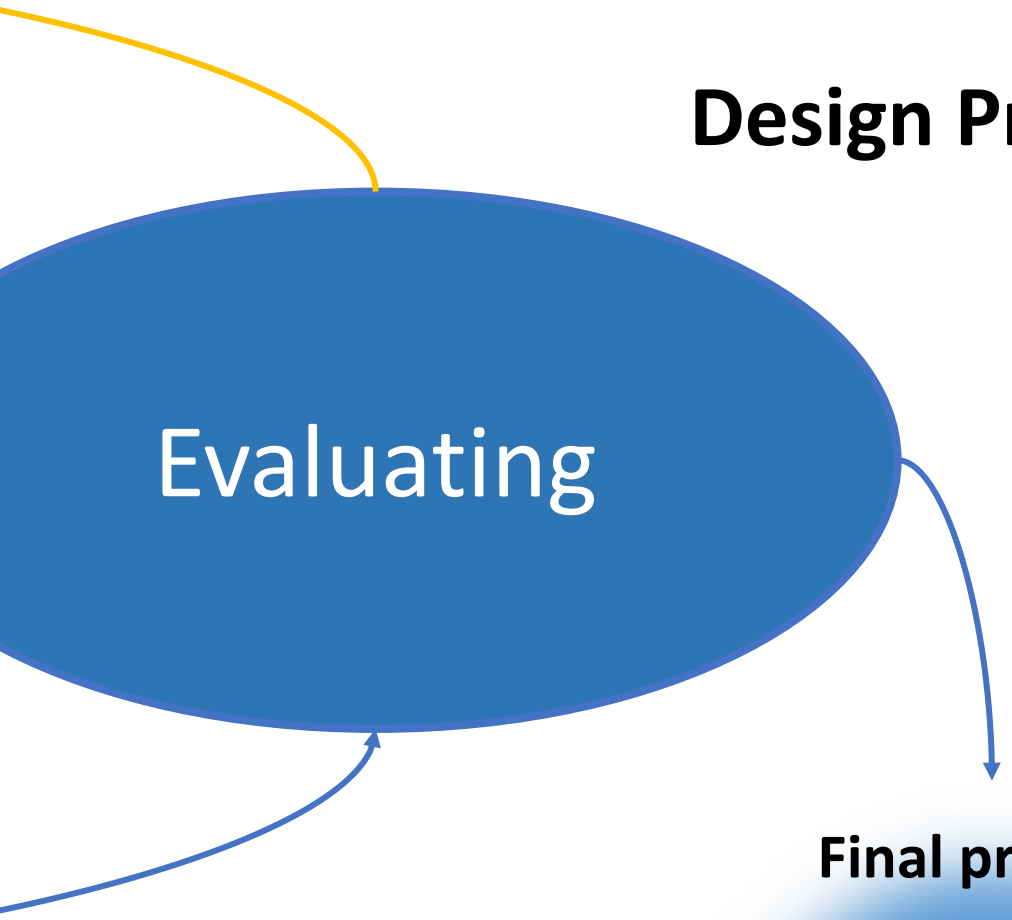

- Create an interactive model!

Design Process

Design Process

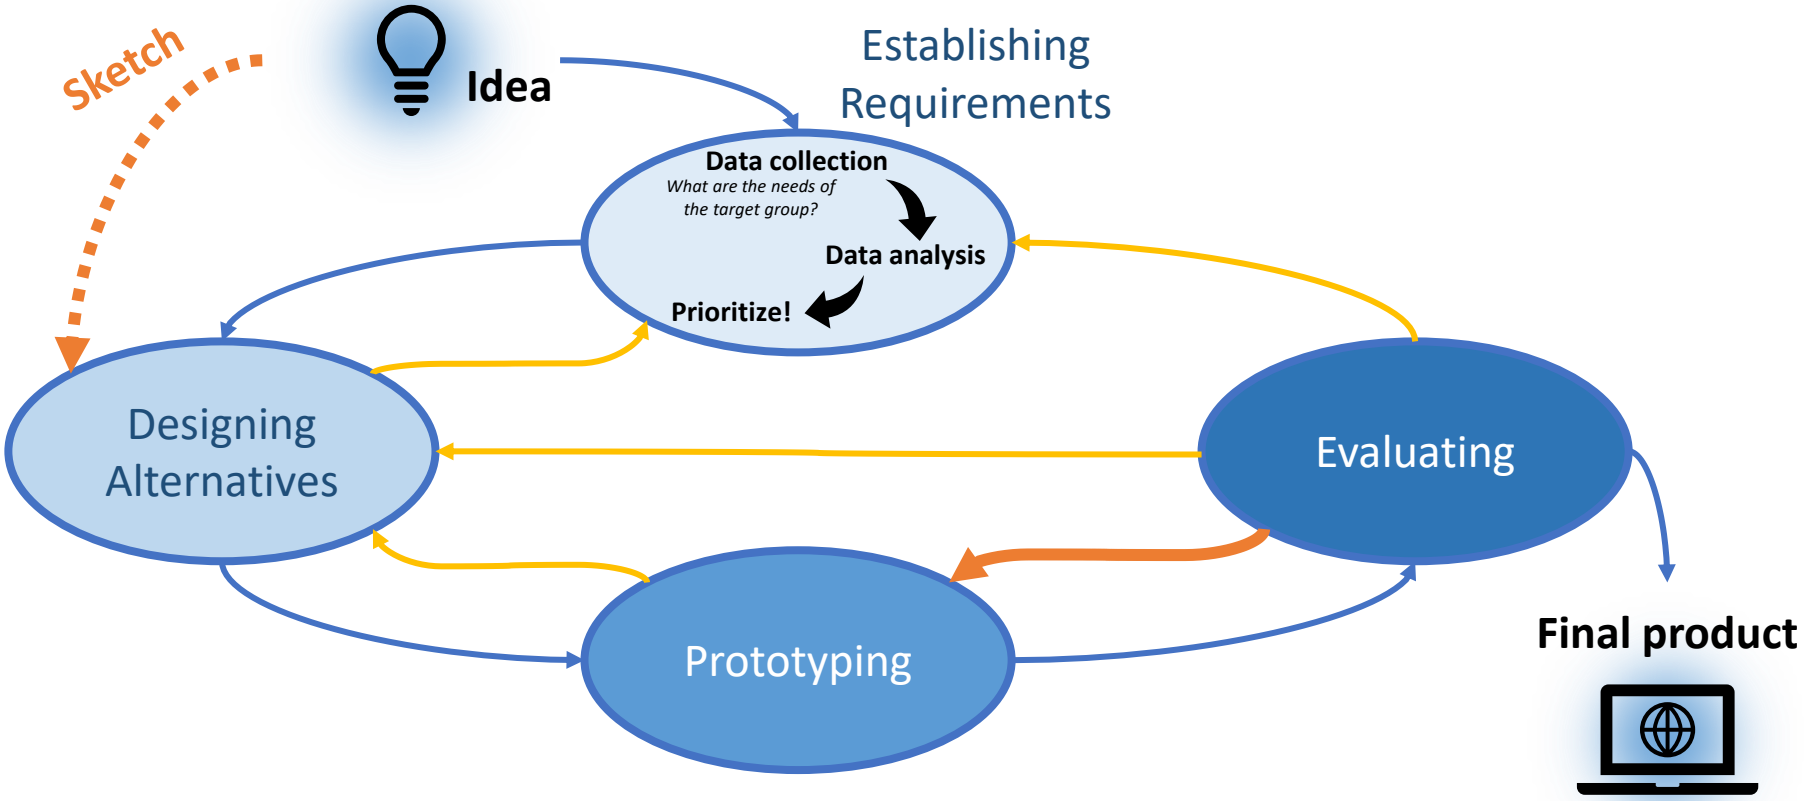

- Usability tests
- Data collection & analysis cycle

Final product

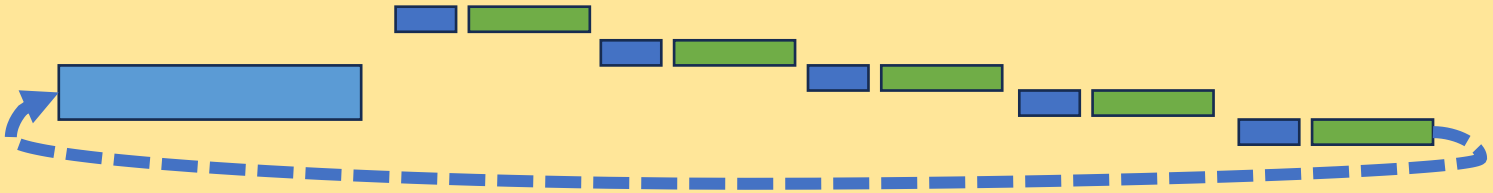

Design Process

Exercise #1 – Design Studio

- Read “Design Studio” approach!
  - Then we should exercise ☺

- You are trying to solve the following problem:
  - Solve the **campus navigation problem**
    - What are the problems?
    - Easy navigation
    - Event locations? Real-time updates?
  - Start sketching and follow the iterative collaborative design process of Design Studio

- Let’s try this for two iterations (45 minutes limit)!

Project Work

- Any project ideas already?

- Groups?

Exercise #2 – Design Studio for the project

- Do you have a problem?

- Great!!

- List a few ideas
- Pick a problem!

Start sketching and follow the iterative collaborative design process of Design Studio

- Have you already finished?
  - You can try doing a couple of iterations for each idea
