Alternative Assignment for Project Session 2

Student Name	*Project group*	*Project topic/title*
Obid Alrhman Aljabi Yacoub Dawli Sarshar Chavoshi Rad	1	Omnisound (The full page audio exp)

Place, time, target group for qualitative data collection

Place - Mittuniversitet

Time - 9:25

Target group – Audio fans

Very briefly (at most 5 sentences) describe the information for interviewees (for informed consent)

…

Hello, are you a fan of all things audio? Music, podcasts or even audio books?
if you wouldn't mind, we are doing a qualitative search for our website, and we would cherish your opinions regarding the user experience on our new audio lovers platform.

Formulate qualitative questions

1- What audio programs do you use and what aspects of these programs do you like.
2- How do you think these programs could be improved, is it missing a dearly missed feature?
3- Would you be willing to expand the horizon on what an audio program can do? For example, instead of just music, you can listen to audio books and podcasts in the same place.
4- We are going to show you the UI give us your first impressions.
5- Do you see your self using our UI? Imagine you are using it, how would your workflow be like?
6- Is our pictures missing something? If the platform were to be real, what features would you like to see in it.

Review the questions yourself

- Are the questions open?
    - Yes, they are
- Are the questions clean and defined?
    - A bit jumbled but natural and fun.
- Are the questions clear? (facilitates analysis)
    - Yes, they are casual but quick to get to the point.

- Can the question be specified? (more interesting result)
    - Yes, they could be.

Please indicate the recording method

Handwritten notes.

Who interviews, who records

Yacoub Dawli interviews
Obid Alrhman Aljabi and Sarshar Chavoshi Rad write down the interviews.
